- Leadership
- Presentation
- Project Management
- Good Communication

Here is my GitHub account for some of
my projects - [@chivicoko](#)

Experience

Australian Contract — Full Stack Python Developer (January 2024 -)

This an Australia-based contract in which I do mostly web scraping and managing and updating the company's private desktop application. I use python and PyQT (with Pyppeteer, BeautifulSoup,...) mostly, and occasionally use PHP.

Premium ESOWP Limited, Awka Nigeria — Frontend (ReactJs) Developer (April 2023 -)

My role at Premium ESOWP Limited is to create UIs and/or transfer figma UI into code (as the case may be) for our clients, which include different companies like Educational Institutions, Construction companies, all sorts of companies. I and the rest of the team use the best technology for any individual project - HTML, CSS, JavaScript, Bootstrap, React.

Dufuna Code Camp, Ibadan Nigeria — (Trainee) Full Stack Developer (July 2022 - January 2023)

Received 4 months practical training and mentorship on software development using Javascript, PHP, CSS, HTML, React, Slim, Eloquent.

Built multiple applications like a full stack shopping app (php), customer service app (reactjs), music app (MERN stack).

University of Michigan — (Trainee) Python Developer (April 2020 - October 2020)

Received 6 months intensive hands-on training on the Basics and Rudiments of Python programming language, in the Coursera platform.

Successfully built a full blog app using Python and Django

Education

Nnamdi Azikiwe University, Awka, Nigeria — BA Music (November 2015 - July 2019.)

Projects

S-Mate App— February 2024

Built this django app for easily fetching current jobs postings online for job hunting purposes. I also went ahead to extend it for blog posts, and students who need past questions to prepare for examinations. These different sections of the app have restrictions for users at different levels. The [GitHub link](#).

Planner App — December 2023

An app for planning yourself better and for scheduling your events far ahead of time with date specifications and email reminders. Built with Python and PyQt for PCs. The [GitHub Link](#)
